

Built-In Refrigerator

Built-in refrigerators are a fantastic way to upgrade your refrigeration from keeping your food cold to food preservation. Given the way that they are manufactured, with two separate compressors, they will last approximate twice as long as a traditional freestanding refrigerator.

Types of Built-In Refrigeration:

- All Refrigerator
- All Freezer
- Bottom Freezer
- Over-Under Refrigeration

Installation options:

- Flush Install
- Standard Install
- Install with Custom Panel

Available Measurements:

- Widths: 18", 24", 30", 36", 42", 48"
- Height: 84"
- Depth: 24" (Always counter depth)

Brand Availability:

- SubZero
- Thermador
- Signature Kitchen Suite (SKS)
- JennAir
